

The Natural Healing Medical Center is an integrative medical center where both conventional and natural medicine is practiced.

Our focus is to treat disease and restore health using natural medicines first.

At the Natural Healing Medical Center we consider treatment with the understanding that physical,

mental, emotional, and spiritual aspects are essential components of each person's overall health.

We strive to identify and correct the underlying cause behind the symptoms of illness!

WHY CHOOSE OUR PRACTICE?

Unlock a Healthier, Happier You!

As a naturopathic medical clinic, we offer the best of all worlds: conventional medical science, natural

medicine and traditional healing modalities such as acupuncture, oriental medicine and botanical

medicine. While we rely on many of the same modern techniques as other primary care physicians

— physical examinations, laboratory testing, minor surgery and diagnostic medical imaging — we

also draw from the wisdom and simplicity of nature and ancient, proven healing disciplines.

Most importantly, you are more than a patient. We consider your interest and participation

as integral components of your good health.

- Licensed in both conventional and naturopathic medicine.
- We put natural medicine first.
- We seek to identify and treat the underlying cause of illness.
- We collaborate with, and when appropriate, refer patients to other medical specialists.

The key to unlocking a healthier, happier you lies in our blend of science and nature in

therapeutic modalities that focus on results.
